

Lunch Seminar 11

奇美醫院 OPAT 作業指引及抗生素 24 小時連續靜脈輸液經驗分享

OPAT (Outpatient Parenteral Antibiotic Therapy) Protocol and 24 Hours

Antibiotics Continuous Infusion – ChiMei Hospital Experience Sharing

(本演講由百特醫療產品股份有限公司贊助)

時間：2025 年 6 月 28 日(六) 12:30~13:30

會議室：402CD 會議廳

座長：黃建程醫師(奇美醫院)

講師：湯宏仁醫師(奇美醫院)

講座簡介

因應醫療環境的改變，OPAT(Outpatient Parental Antibiotic Therapy)以及在宅急症照護(Hospital at Home)逐漸變成現代醫療重要的一環。透過 OPAT 以及 HAH 讓病患得以在家接受生素的治療亦可舒緩病患在急診待床的壅塞。另外透過 24 小時抗生素連續靜脈輸液給藥的方式將可拓展可使用的抗生素種類或進行降階治療以符合抗菌藥物管理原則(antimicrobial stewardship program)，提供病患適切的治療計畫。本會議將透過奇美醫院的經驗，分享其 OPAT 作業指引及抗生素 24 小時連續靜脈輸液經驗。

In response to changes in the medical environment, OPAT (Outpatient Parental Antibiotic Therapy) and HAH (Hospital at Home) have gradually become an important part of modern medicine. Through OPAT and HAH, patients can receive antibiotic treatment at home and relieve the congestion of patients waiting for beds in the emergency department. In addition, 24-hour continuous infusion of antibiotics will expand the types of antibiotics that can be used or perform de-escalation treatment to comply with the antimicrobial stewardship program and provide patients with appropriate treatment plans. This conference will share the OPAT protocol of Chi Mei Hospital and the experience of 24-hour continuous infusion of antibiotics.
