主持人：陳石池醫師(台大醫院)、黃集仁醫師(林口長庚醫院)

主講人：Prof. Lim Swee Han 林瑞漢教授 (Singapore General Hospital)

課程簡介

On 22 Jan 2020, Singapore General Hospital admitted the first Covid -19 patients in Singapore -a Chinese national from Wuhan with fever, sore throat and cough. As of 17 Aug 20, Singapore has reported a total of 56,031 Covid-19 cases (rank 22nd in the world in total cases per million population), 27 death from Covid-19 and has performed more than 1.7 million Covid-19 swab tests (rank 14th in the world). I will discuss i) How our emergency ambulance services, emergency department, hospital and community re-organised and ramp up its capacity to prepare for this pandemic. This include screening of patients (and accompanying persons) presented to the hospitals with respiratory symptoms or\ and fever (of unknown sources), personal protective equipment guidelines, disposition of the patients, visitor policy and staff surveillance. ii) Clusters of Coiv-19 infection in the community including dormitories and construction sites and how they are managed in the community. li) Safe distancing measures that are being enforced in the public or work places.
