Plenary lecture IV：Unlocking the Potential of Government-Academia Partnerships: Taking Disaster Medicine to the Next Level

時間：2023 年 7 月 8 日(六) 10:50~11:20

會議室：101 會議廳

主持人：方震中醫師(臺大醫院)、許建清醫師(奇美醫院)

主講人：Dr. Saleh Fares Al-Ali (Department of Health- Abu Dhabi)

課程簡介

The world faces increasingly complex challenges, from climate change and global health crises to economic disparities and social inequalities.

Addressing these challenges requires innovative and effective solutions that leverage the expertise and resources of multiple stakeholders, including governments and academia. Collaboration between these two sectors has the potential to generate significant positive impact on society, but it also comes with its own unique set of challenges.

In this talk, we will explore the opportunities and challenges of government-academia partnerships and how they can be leveraged to advance the public good. We will examine successful examples of collaborations between government and academia, highlighting their impact and lessons learned. We will also discuss the potential benefits of such partnerships, including increased access to expertise and resources, enhanced policy development, and improved public trust.

However, such partnerships also come with challenges, such as differences in culture, priorities, and expectations. We will explore these challenges and identify strategies for overcoming them. Key topics will include building trust and communication, defining shared goals and objectives, and navigating ethical and legal considerations.

The talk will conclude with a call to action for stakeholders in government and academia to work together to unlock the full potential of partnerships for the benefit of society. By fostering collaboration and innovation, we can achieve our shared goals of a better, more equitable world.
