

院前急救、醫療指揮與派遣、急診與院前的銜接、替代緊急醫療路徑、社區緊急醫療推廣，以及緊急醫療研究與創新等多個面向，並提供急診與救護車見習機會。此外，參與者還可體驗如何設計急救教育推廣工作坊，獲得全面的 EMS 管理與臨床實務經驗。

台灣的緊急醫療體系已高度發展，但各國制度不同，仍有許多可借鏡之處。本次講座將介紹新加坡 EMS Fellowship 的核心內容，並探討其運作模式與台灣體系的異同，期望提供參與者更多國際視角，以促進台灣緊急醫療體系的持續進步與創新。

- **緊急救護教育新磐石：EMTP 新大白教什麼？**

As Emergency Medical Services (EMS) continue to evolve, the education of Emergency Medical Technician-Paramedic (EMT-P) must advance accordingly. The 3rd edition of the Paramedic Textbook reflects this progress by integrating updated regulations, emerging medical knowledge, and the latest challenges in prehospital care. This edition introduces critical new topics such as prehospital ultrasound, confined-space and high-risk environment rescue, disaster response, and Team Resource Management (TRM). It also incorporates multimedia teaching tools to enhance both clinical decision-making and procedural skills.

This lecture will highlight the major updates in this new edition and discuss their significance for EMS education in Taiwan. I hope to offer attendees a clear and practical insight into the structure, content, and core training principles of EMT-P education in Taiwan today.
